

Ispitivanje magnetskim česticama

- MT -

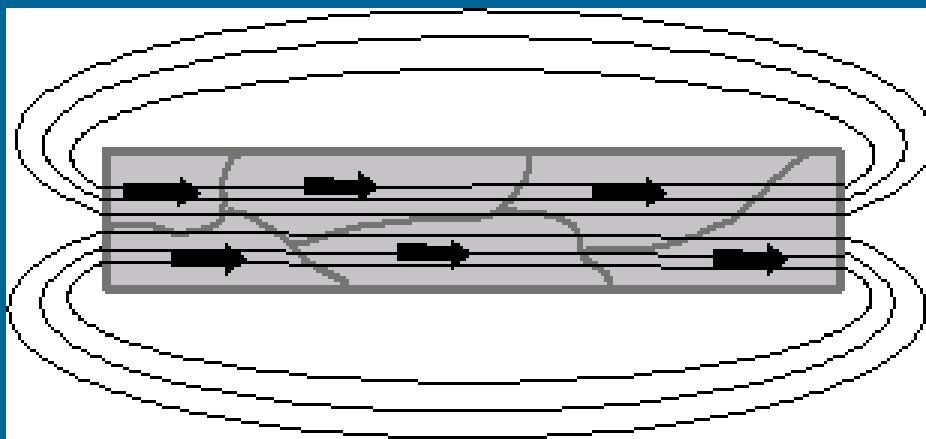

Magnetic Particle Testing

Damir Markučić

MT - princip

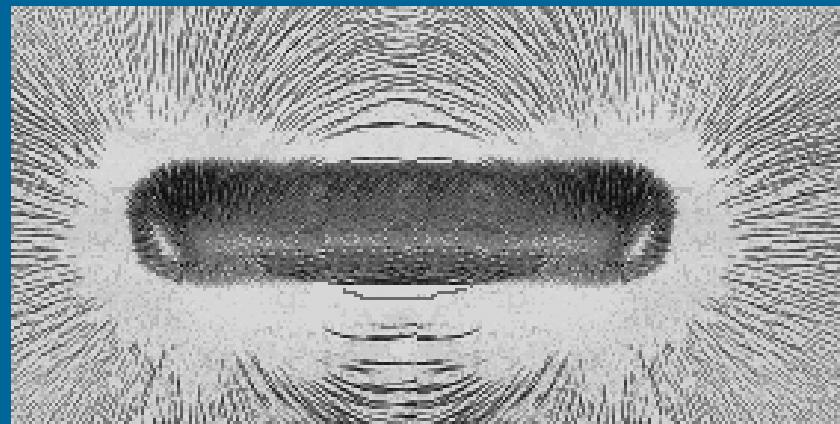

“normalno” stanje

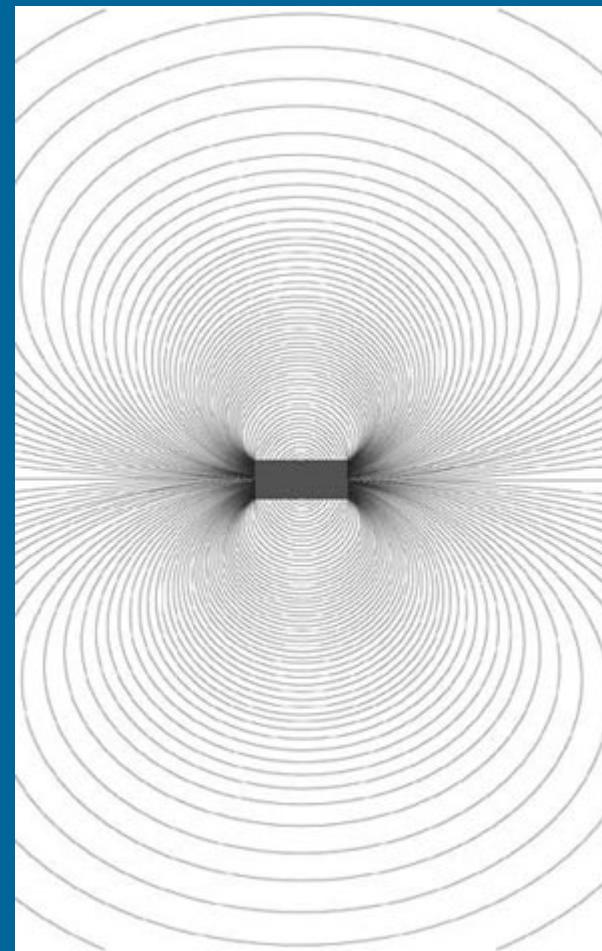

magnetizirano stanje

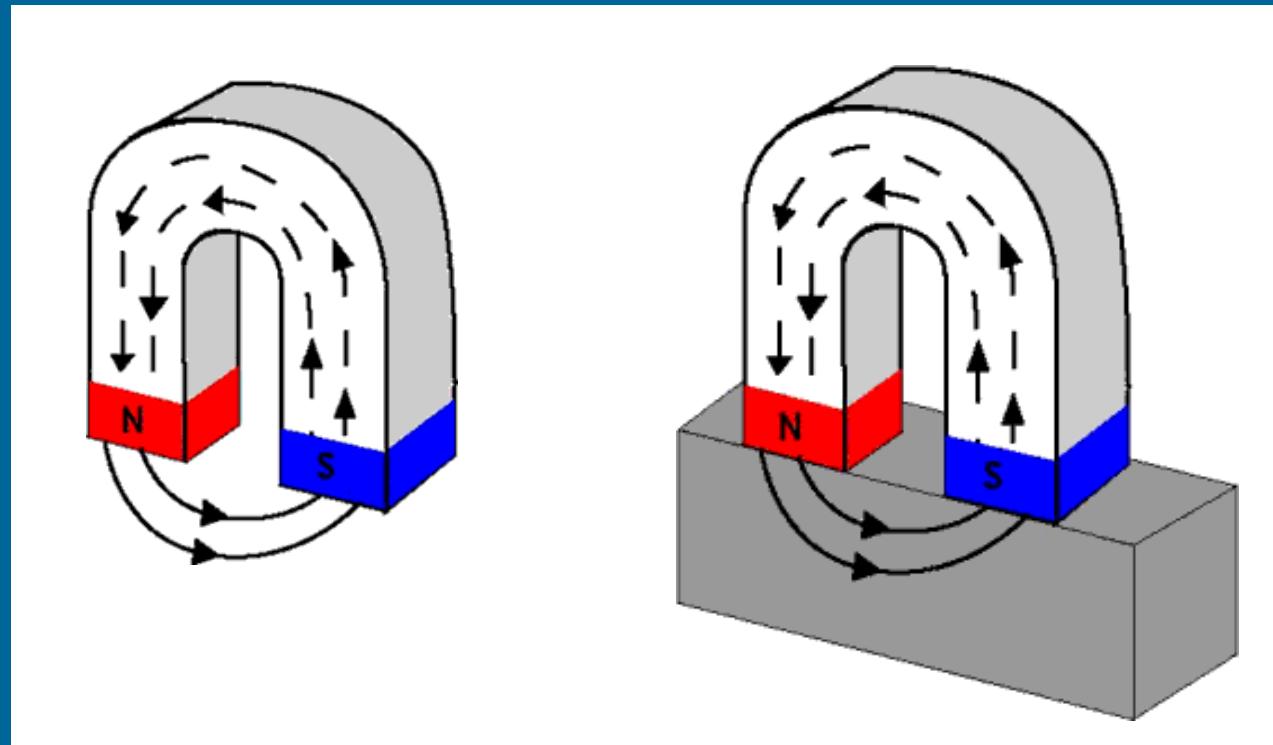

MT - princip

- silnice magnetskog polja
- magnetski tok, gustoća toka

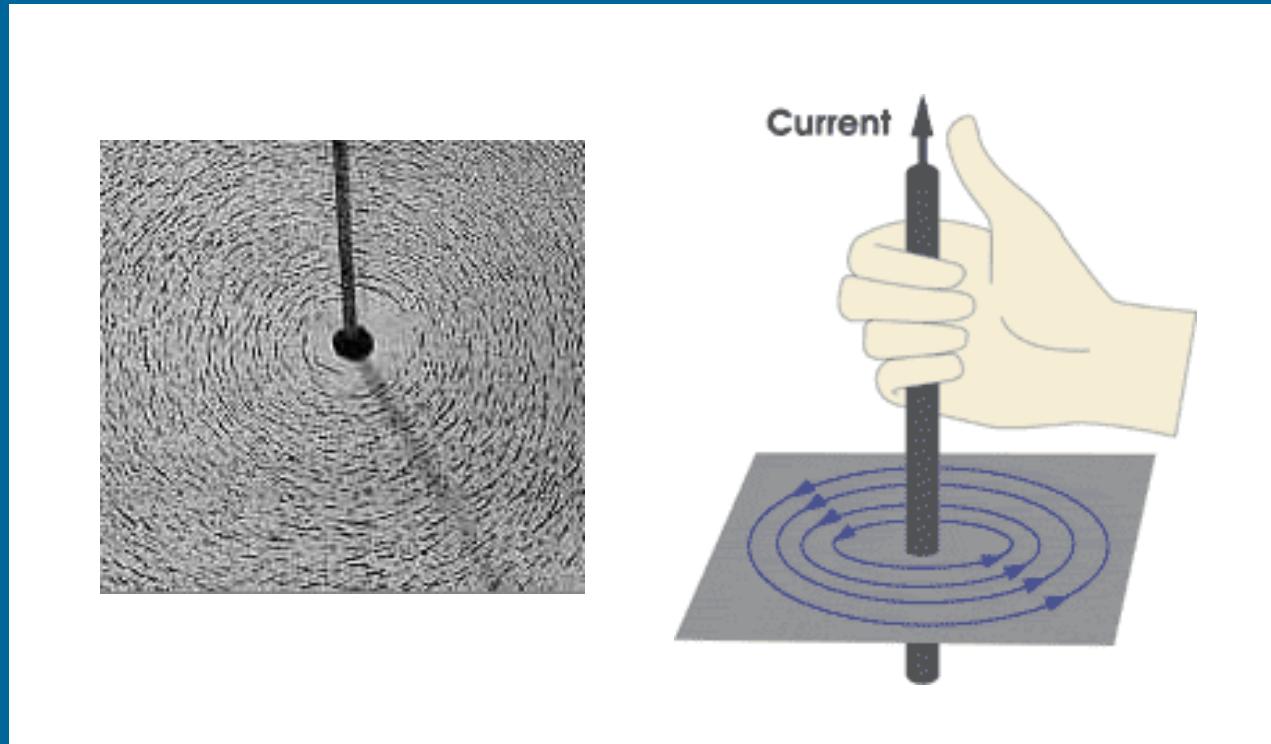

MT - princip

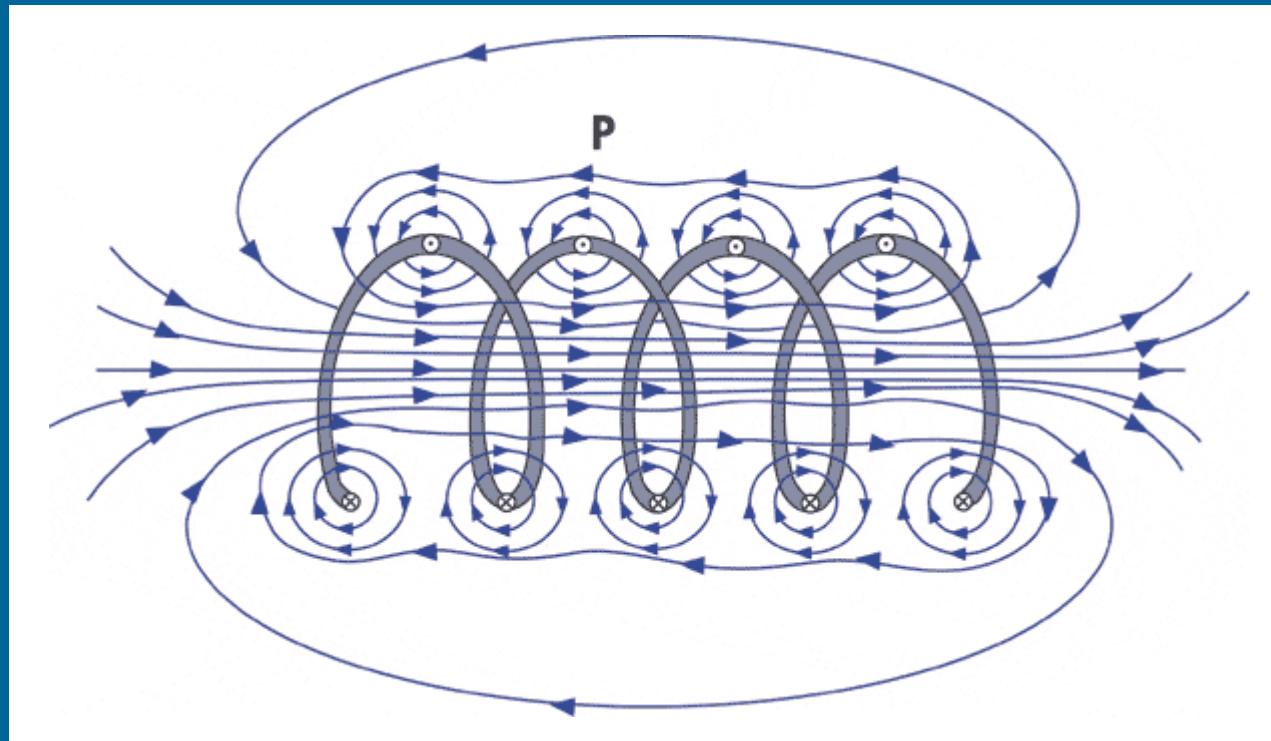

“zatvaranje” magnetskog toka kroz različite medije - permeabilnost

MT - princip

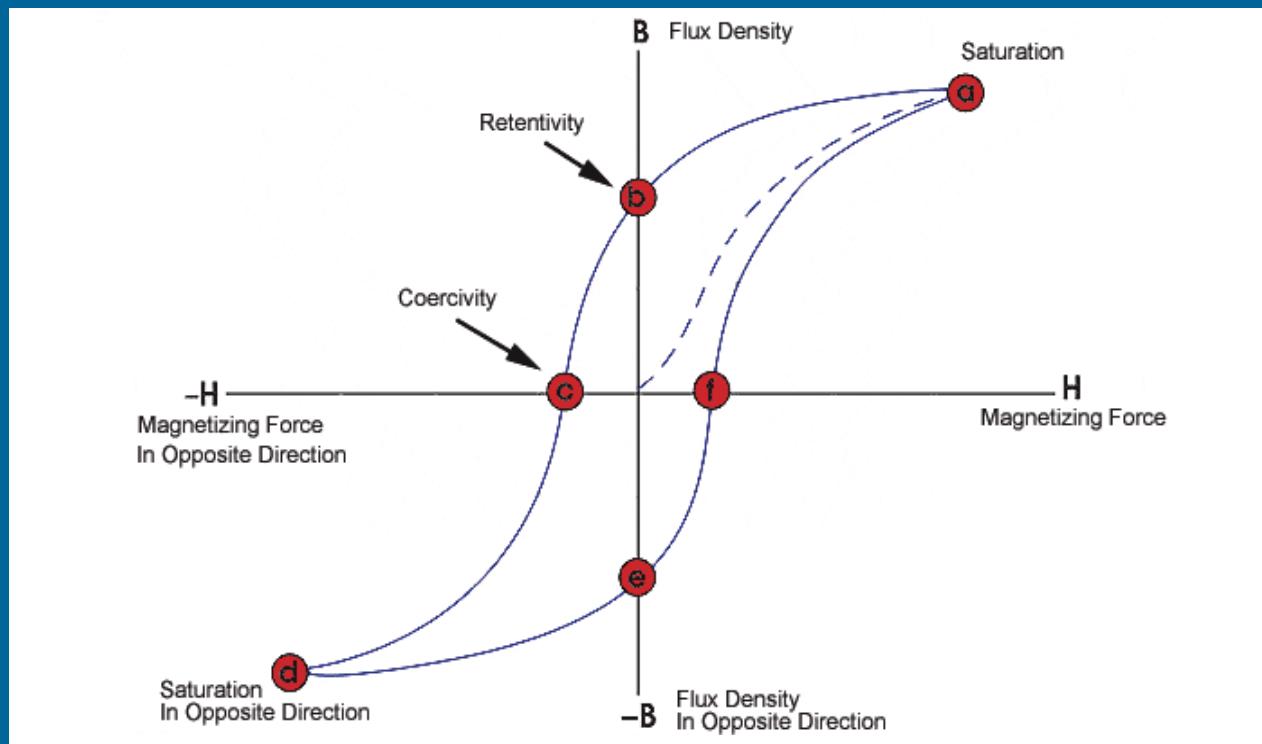

elektromagnetska indukcija – induciranje
magnetskog polja pomoću el. struje

MT - princip

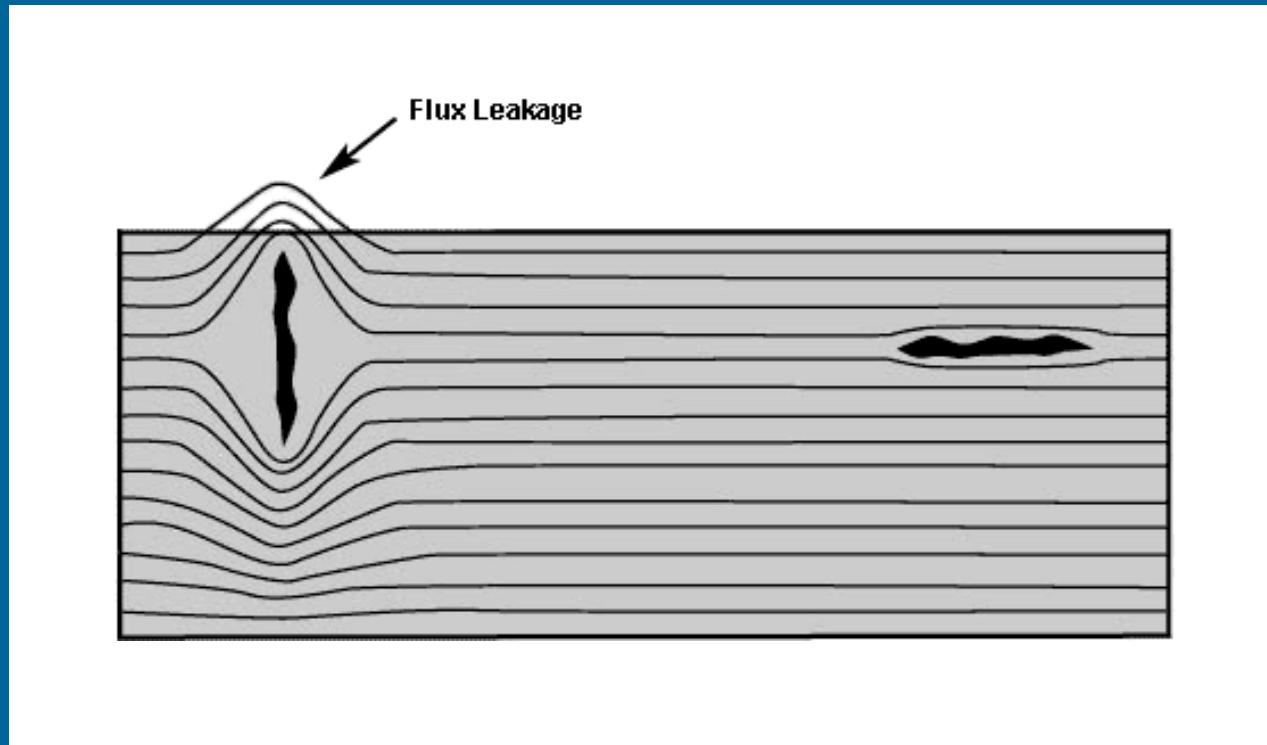

magnetsko polje inducirano zavojnicom

MT - princip

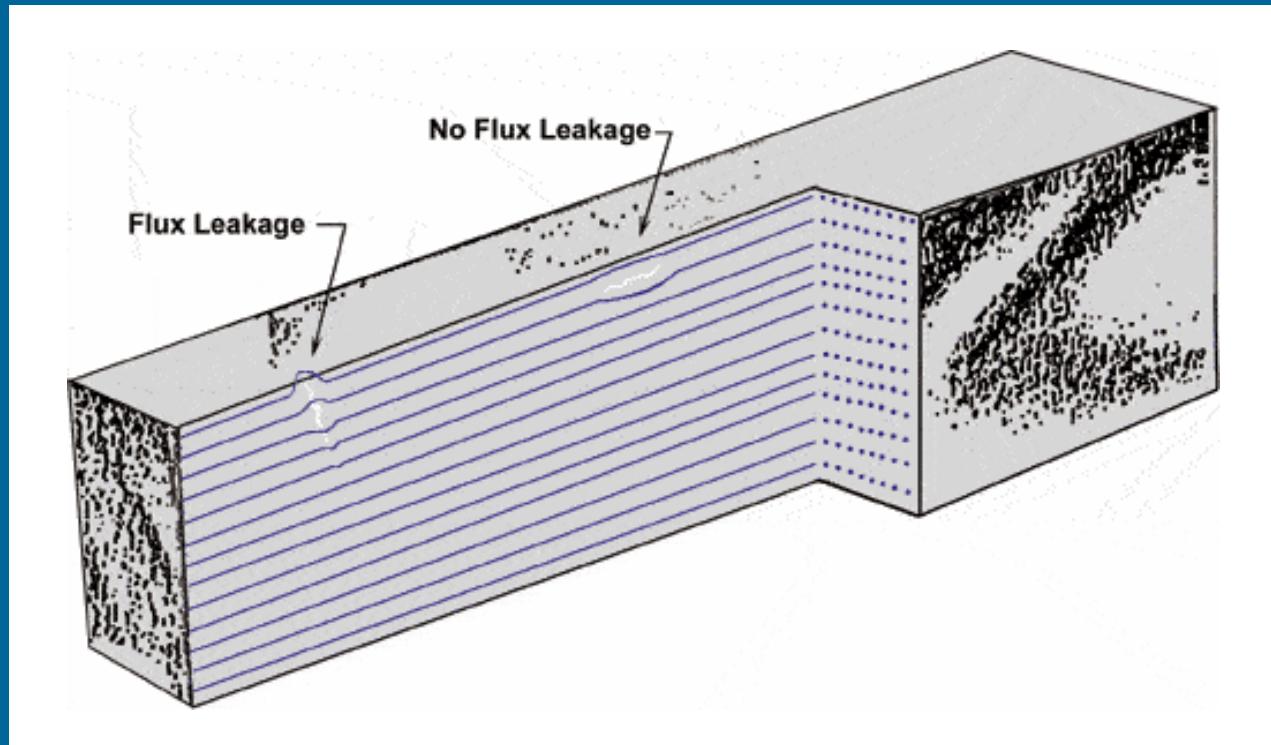

krivulja histereze

MT - princip

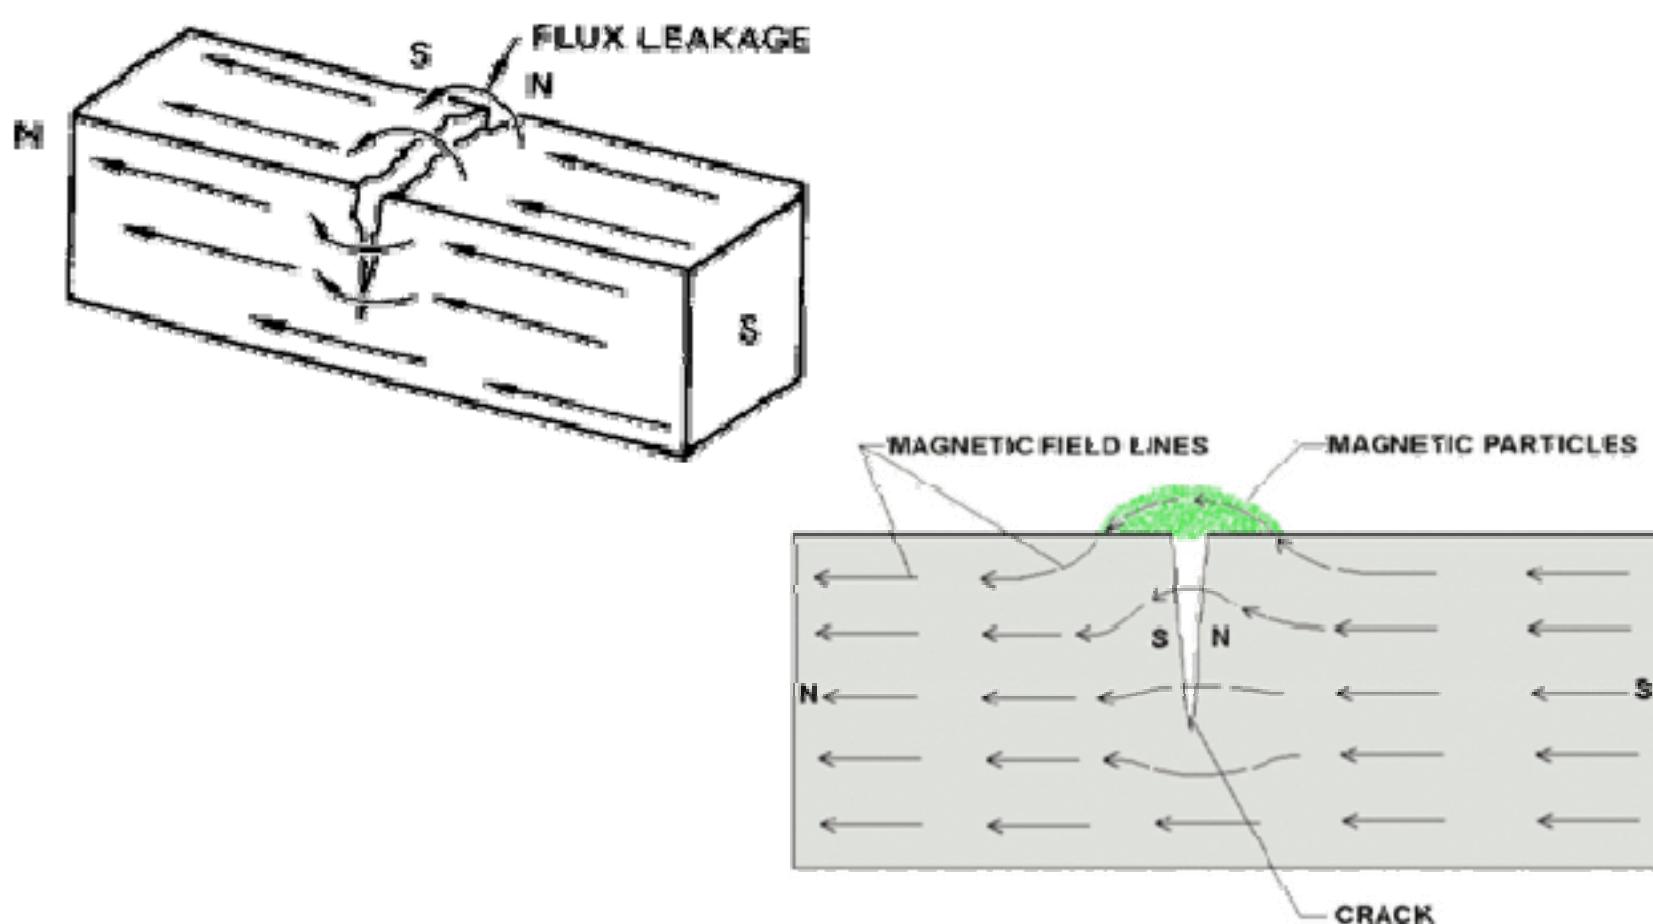

distorzija polja uslijed nepravilnosti

MT - princip

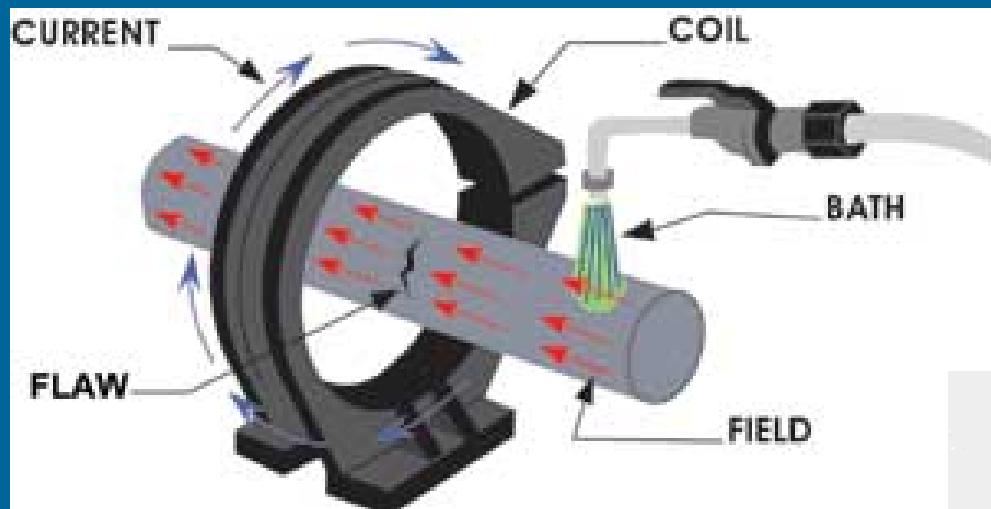

“odziv” (*flux leakage*) na ispitnoj površini ovisno o orijentaciji nepravilnosti

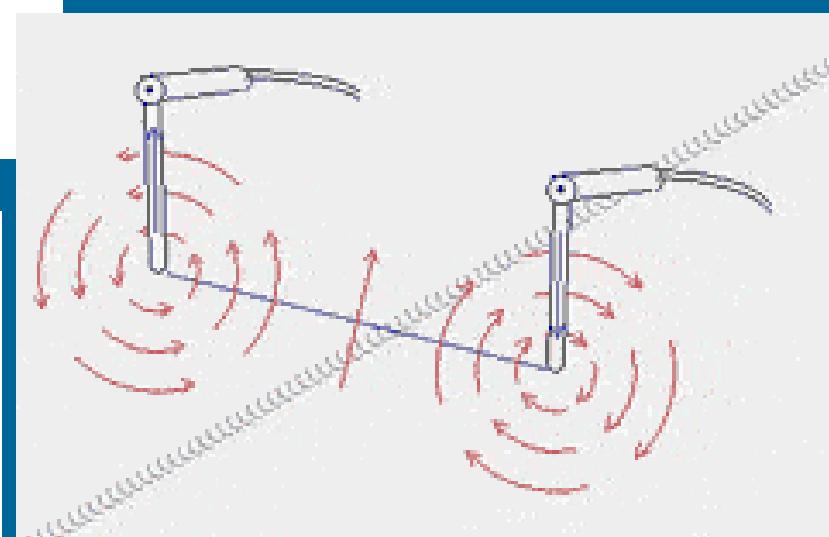

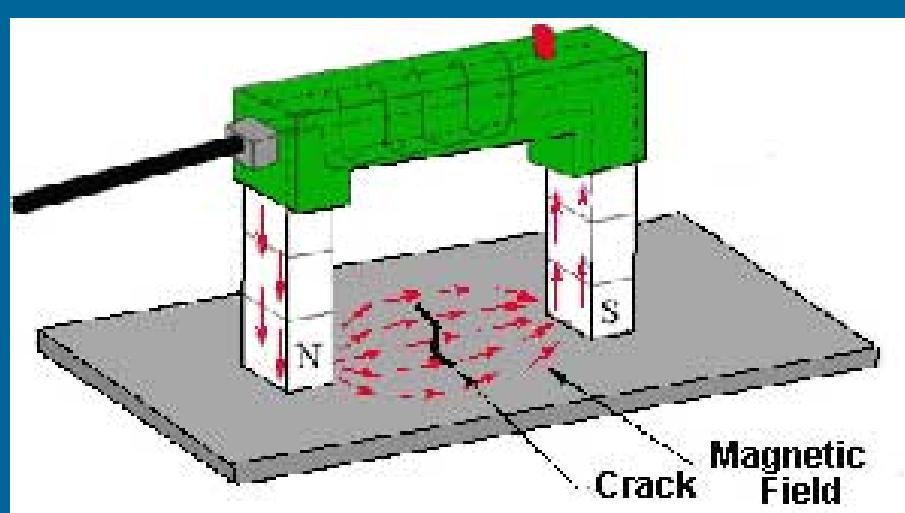

Ispitivanje magnetnim česticama (MT)

MT – tehnike magnetizacije

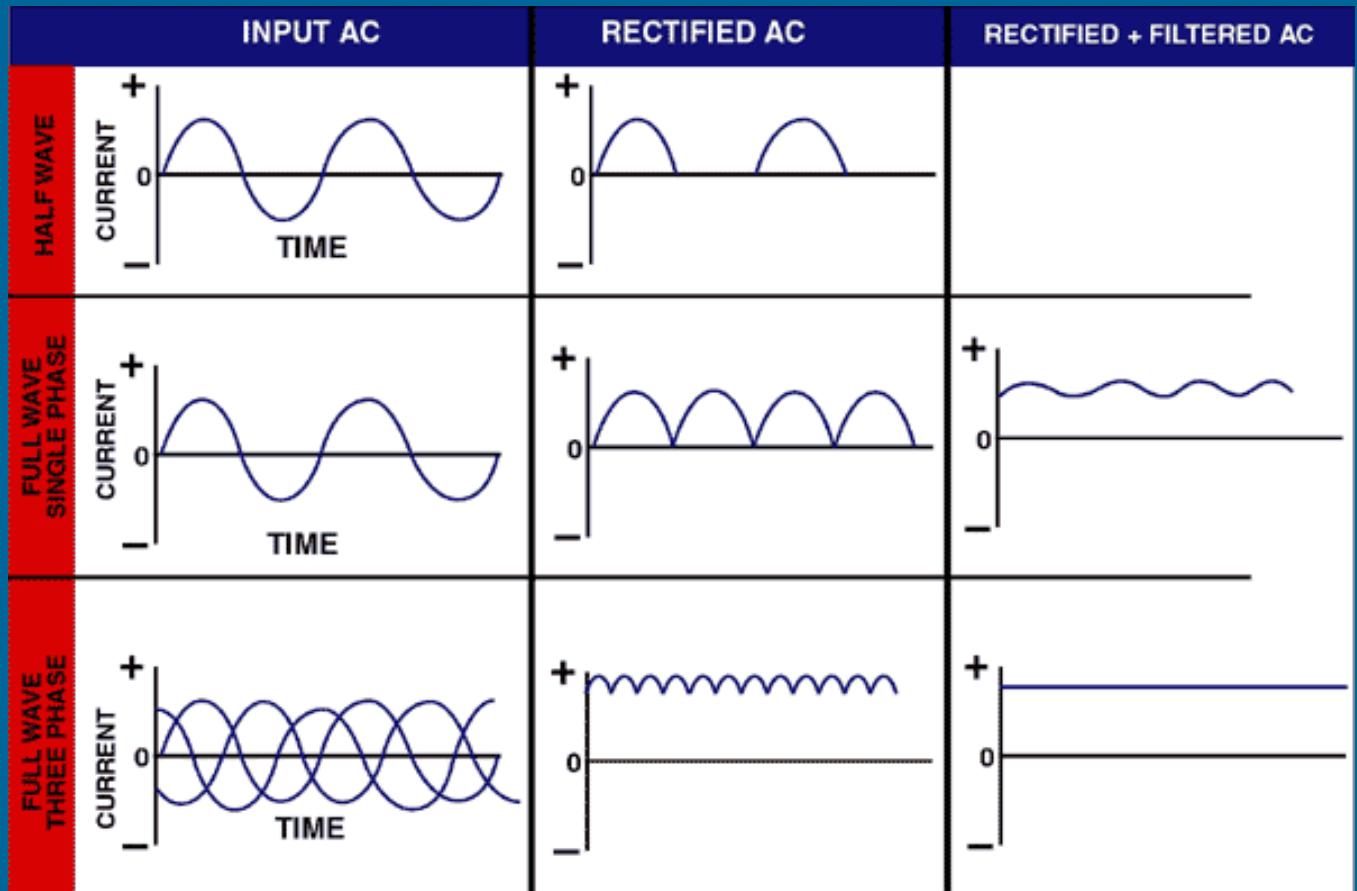

zavojnicom

jaram

MT – struja magnetizacije

različita “penetracija” za AC i DC pobudu

MT – čestice

- fluorescentne
- crne + podložna boja
- suhe
- mokre
 - suspenzija
 - koncentrat

MT – opća načela

- ⇒ samo feromagnetski materijali !!!
“tvrdi” - npr. martenzitni č., manji μ , veći H
i “meki” - npr. niskolegirani č., veći μ , manji H

- ⇒ dva međusobno okomita smjera magnetizacije !
- ⇒ jakost mag. polja $> 2 \text{ kA/m}$
- ⇒ preko sloja premaza $< 50 \text{ } \mu\text{m}$
- ⇒ odnos “širina – dubina – duljina” nepravilnosti: 1 – 10 – 50
- ⇒ veličina čestica $0,1 \text{ } \mu\text{m}$ do $10 \text{ } \mu\text{m}$

MT – primjene & zahtjevi

- ⇒ suhe i mokre čestice (uljne i vodene suspenzije)
 - temperaturno područje primjene
 - hrapavost površine
- ⇒ uvjeti promatranja: (HRN EN ISO 3059)
 - rasvjeta - min 500 lx;
 - UV - min 1000 $\mu\text{W}/\text{cm}^2$, max 20 lx
- ⇒ provjere ispitnog sustava i elemenata sustava
- ⇒ **DEMAGNETIZACIJA !**
- ⇒ HRN EN ISO 9934-1, HRN EN ISO 9934-2,
HRN EN ISO 9934-3
HRN EN 1290, HRN EN 1291

MT – kriterij prihvatljivosti, HRN EN 1291

⇒ Za **linearne** indikacije

Accept. Level 1 $l \leq 1,5 \text{ mm}$

Accept. Level 2 $l \leq 3,0 \text{ mm}$

Accept. Level 3 $l \leq 6,0 \text{ mm}$

⇒ Za **ne-linearne** indikacije

Accept. Level 1 $d \leq 2 \text{ mm}$

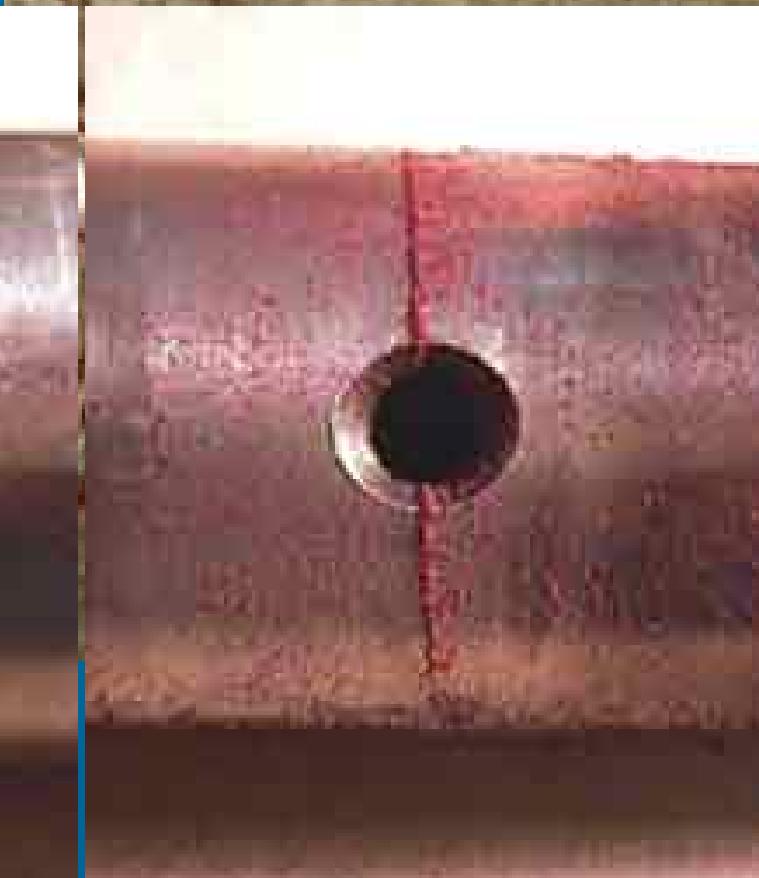

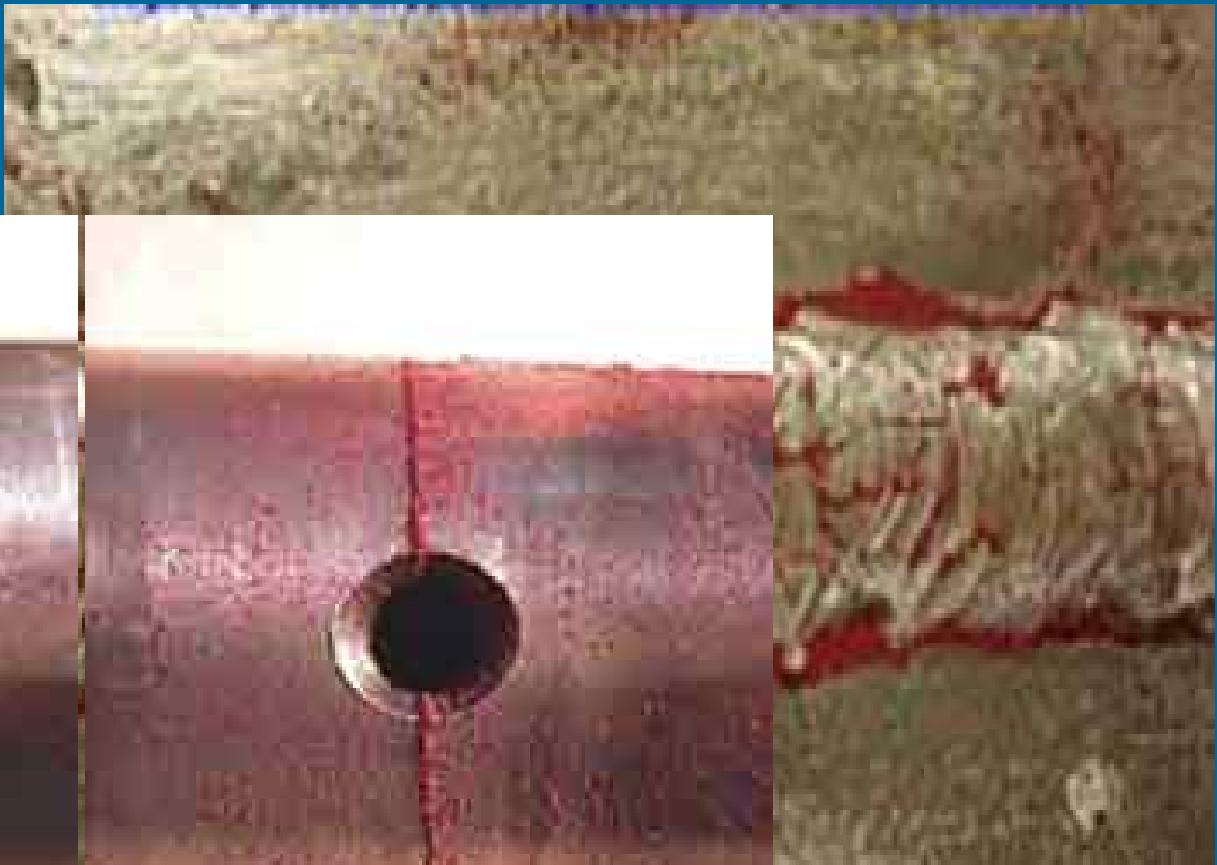

Accept. Level 2 $d \leq 3 \text{ mm}$

Accept. Level 3 $d \leq 4 \text{ mm}$

⇒ Accept. Levels 2 & 3 mogu imati “X” Level 1 !!!!

Primjeri indikacija za MT

obojene - crvene
magnetne čestice.

Primjeri indikacija za MT

fluorescentne
magnetne čestice.
