

RESEARCH POSITIONS - LEC GMBH

The Large Engines Competence Center (LEC) is Austria's leading research institution in the area of combustion technologies for large engines. Our focus is on developing environmentally sound, efficient and robust large engines.

The main objective of the COMET-K1 center LEC EvoLET as part of LEC GmbH is to create the foundation for a quantum leap in technology to the next generation of gas and dual fuel engines, thereby enabling the best use of these engines in a wide variety of applications.

We are looking for committed and motivated individuals with a talent for research. We support equal opportunity and diversity.

Fields in demand:

Mechanical engineering, mechatronics, computer science, telematics, technical physics, technical chemistry, technical mathematics, process engineering, software development, automation technology

Please follow the link: <http://www.lec.at/jobs/?lang=en>

Become part of our successful LEC team! We look forward to your application.
