Obojeni
(crveni) penetrant

Ispitivanje penetrantima (PT) - u “brojkama”

Zahtjevi / osjetljivosti / podjele / ostale tehnike:

- ⇒ pukotine šir. 1 µm, dub. 10 µm, dulj. 100 µm
- ⇒ čišćenje površine:
mehanički, jetkanje, parno i kem. odmašćivanje,
- ⇒ odstranjivanje viška penetranta s površine
VPP, OOP, PEP
- ⇒ uvjeti promatranja: (HRN EN ISO 3059)
rasvjeta - min 500 lx; UV - min 1000 µW/cm², max 20 lx
- ⇒ temperaturno područje primjene: 10^o do 50^oC
- ⇒ može i za ispitivanje propusnosti
- ⇒ HRN EN 571-1, HRN EN ISO 3452-2 i 3, HRN EN 1289
