

## **Prof. dr.sc. Tshewang Lhendup: Bhutan - its history, culture and current perspectives**

### **Abstract**

The presentation of prof. dr.sc. Tshewang Lhendup is divided into four parts. Firstly, he will briefly introduce his country, its history, geography, climate and development philosophy which is different from most of the other countries. This will be followed by a short presentation on the education system and university, College of Science and Technology, Royal University of Bhutan. In the third part, prof. dr.sc. Tshewang Lhendup will talk about Renewable Energy – Opportunities and Challenges in Bhutan. Finally, he will present results of minor research that the College undertakes and possible areas of future collaboration with Faculty of Mechanical Engineering and Naval Architecture, University of Zagreb.
