

At the Faculty of Mechanical Engineering and Naval Architecture, University of Zagreb, we are trying to make students mobility a life-long positive experience. In order to achieve that, we need feedback. The opinion of each incoming student is valuable information from which we can conclude what we can do better or what needs improving. Please, spare a moment and participate. The survey is anonymous and no personal data will be recorded.

1. Please, select the grade which best describes the following statements where 0 represents disappointment, 5 full satisfaction, and 3 being neutral.

0 1 2 3 4 5

2. Any comments you would like to add (please, without any personal information concerning you or any other person).

1	anonymous	This stay was an exceptional experience at all levels. Generally spoken a more than great time! The concept of combined lessons with Croatian Students in English was really good to get to know easily how the university works and also from a cultural point of view. Also the lessons only for ERASMUS students were really interesting. The administration and welcoming was really warm and especially the Buddy Programme helped a lot for organizing x-ica. The material provided for the selection of the semester courses was sufficient and helpful.
2	anonymous	Please give the FreeMover the same information like the erasmus exchange students. I had only 30% of the information the erasmus students had.

Because of that I could only earn 5 ECTS for my studies. The other courses which could have give me some credits were unknown for me. Because of that I don't recommend anybody to go to your faculty as a FreeMover.
