First announcement and call for papers:

As for GSI'13/GSI'15/GSI'17/GSI'19/GSI'21, the objective of this 6th SEE GSI'23 conference, hosted in Saint-Malo, is to bring together pure/applied mathematicians and engineers, with common interest for Geometric tools and their applications for Information analysis and Learning. It emphasizes an active participation of young researchers to discuss emerging areas of collaborative research on "Geometric Science of Information and their Applications".

GSI presents a panorama of Geometric Tools emphasizing mathematical theory, physical model, computational methods, and applications in mathematics, physics, statistics, engineering, signal/image processing, machine learning and data science.

The Conference will be therefore held in areas of topics of mutual interest with the aim to:

- Provide an overview on the most recent state-of-the-art
- Exchange mathematical information/knowledge/expertise in the area

This conference will be an interdisciplinary event and will unify skills from Geometry, Probability and Information Theory. *Proceedings are published in Springer's Lecture Note in Computer Science series.* MDPI will sponsor best paper & best poster Awards.

Gala Diner will take place in Saint-Malo
