

Vertiv Croatia is looking for a **Continuous Improvement Specialist** for our new production plant in **Rugvica**.

A few words about Vertiv:

- We are a 6.5 billion \$ global organization
- We have nearly 20,000 employees worldwide and we have an established presence in over 130 countries
- We are a global market leader in designing and delivering critical infrastructure solutions
- Even in these turbulent times, our business and industry does not stop, on the contrary – we are constantly growing and expanding, opening new departments and starting new projects

What is this job about?

*Quality and continuous improvement have always been at the core of Vertiv's values. We are working on developing and implementing a new **Vertiv Operating System (VOS)** using the principle **of Lean and Six Sigma** initiatives. We have already successfully implemented various changes within our production processes across Europe and now we also want to bring it to our new factory in Rugvica.*

Come join us if you are...

- A young graduate in **Industrial Engineering and Management** (any experience is a big plus, but not mandatory)
- Passionate about **transformation** projects and **continuous improvement**
- Curious about **Lean** and **Six Sigma** methods and processes
- Not afraid to use **English** daily
- Hungry for **knowledge** and a good team player

Some of your responsibilities will include:

- Leading and implementing Continuous Improvement (CI) projects (e.g. Lean and Lean Six Sigma initiatives) to **improve department performance** in alignment with key initiatives across the organization.

- Developing, executing and sustaining effective process improvements that drive KPI improvements utilizing Vertiv Operating System (VOS) methodologies.
- Frequently interacting with peer groups, normally involving information/best practice exchange, basic problem resolution and process improvement opportunities identification
- You will be **under the direction** of an experienced VOS (Continuous Improvement) Manager where you will be serving as a **change agent** driving the required **cultural transformation** and the adoption of successful process **improvement practices** and by diagnosing barriers to project success and facilitating resolution.
- You will also **lead various smaller business improvement projects** including data analysis, preparation & planning, change management, and training of CI methodology

What's in it for you?

- An excellent opportunity to gain some real-life working experience in a cutting-edge industrial international corporation
- Interesting international projects in a crisis-resistant industry
- Various company bonuses (Christmas, Easter bonus)
- Educations, continuous learning and professional development
- Various other benefits (paid travel expenses, annual medical checkups, free parking, supplementary health insurance (dopunsko zdravstveno osiguranje))
- If you are a young graduate (or have maximum 18 months of working experience) you will be able to take part in our **Vertiv Next Generation program** focusing on personal and professional development
